SOMETIMES PEOPLE GET MIXED UP WITH THE DIFFERENCE BETWEEN A REFUGEE AND A MIGRANT. THE DIFFERENCE IS A REFUGEE HAS TO LEAVE THEIR HOME BECAUSE OF WAR OR CONFLICT. A MIGRANT CHOOSES TO LEAVE THEIR COUNTRY BECAUSE OF LOVE, FAMILY, EDUCATION OR JOBS.

The difference between refugee and migrants?

Refugees leave their homes because of war or conflict, but migrants leave because they chose to do it.

Migrants usually leave because they are living with someone or because of love.

Refugees leave by force and only leave for safety and protection.

Refugee Journeys

Refugees normally go to countries near them. This is because if they went to countries far away they would risk their lives because they might run out of food, water or supplies. Sometimes they might have to travel further because their neighbouring countries don't want them. Refugees from Yemen travel to the UK because the countries near them don't let them live there.

Refugees and the UK

Lots of people think that all the refugees come to the UK but they don't. They tend to travel to countries that are nearer to them because then they won't have to travel that far. If they get rejected and don't get permission to stay in the country, they travel to countries that will accept refugees. The UK is one of them, but it doesn't mean that we have lots of refugees. Refugees go to cities more often because the cities have more supplies to provide for them.
