variable

```
140  
141  
142  
143 :root {  
144   --color-black: $color-black;  
145   --color-shadow: $color-shadow;  
146  
147   --color-white: $color-white;  
148  
149   --color-piratepurple: $color-piratepurple;  
150   --color-piratepurple--hover: $color-piratepurple--new;  
151   --color-piratepurple--pressed: $color-piratepurple--pressed;  
152   --color-piratepurple--disabled: $color-piratepurple--disabled;  
153 }
```

A screenshot of a code editor window displaying a portion of CSS code. The code is contained within a block labeled ':root'. It defines several CSS variables: '\$color-black', '\$color-shadow', '\$color-white', and '\$color-piratepurple'. It also includes declarations for the '\$color-piratepurple' variable, specifically for its 'hover', 'pressed', and 'disabled' states. The code editor interface shows line numbers on the left and a status bar at the bottom.
