

# Welcome to the Zoo

Hello children, we know you have learnt so much this term about animals that now we think you would be the perfect zoo keepers. This week you will add to your zoo and it will grow each day. Please follow the challenges each day to help grow your zoo.

1. First you need to choose how you want to construct your zoo, what materials will you use? Paper, building blocks, lego, cardboard, cereal box
2. Secondly, choose the animals that you would like to look after in your zoo. You must include 5 land mammals, 2 birds, 3 reptiles and 1 amphibian.
3. Can you build the main structure to your zoo and think carefully about how many enclosures you will need. What size will you make each enclosure to ensure the animals are happy and comfortable?
4. Name your Zoo and design a label for the entrance.
