

Counting in and grouping 2s

1 group of 2 is equal to 2

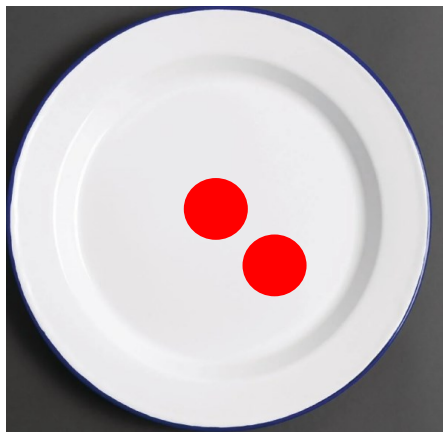

2 groups of 2 is equal to 4

You will need: Plates, a dice, counters/coins.

Roll the dice, the number you roll is the number of plates you put out. Then place 2 objects on each plate, how many groups of 2 do you have? How many objects do you have altogether? Have a go at writing your plates and objects into a multiplication equation.

For a challenge why not roll the dice twice, add together the two numbers and use that as the total number of plates to use.
