

Monday 29.11.21

MPI: Using number bonds to 10 to add 2-digit and 1-digit numbers.

'Fill in the missing numbers.'

$$10 = 5 + 5$$

$$41 + 9 = 50$$

$$20 = 15 + 5$$

$$42 + 8 = 50$$

$$30 = 25 + \square$$

$$43 + 7 = \square$$

$$40 = 35 + \square$$

$$44 + 6 = \square$$

$$50 = \square + 5$$

$$45 + \square = 50$$

$$60 = \square + 5$$

$$46 + \square = 50$$

$$\square = 65 + 5$$

$$\square + 3 = 50$$

$$\square = 75 + 5$$

$$\square + 2 = 50$$

$$\square = 85 + 5$$

$$\square + 1 = 50$$

$$\square = 95 + 5$$

Complete the part-part-wholes.

Mr Rolls has 54 bananas and Dr Biddulph has 6 oranges. Mrs Durning later arrives with 10 pears. How much fruit is there altogether? Write an equation and represent your answer using a part-part-whole or dienes.

Tuesday 30.11.21

MPI: Using making 10 strategy to solve addition equations

Solve the equations using the diene and the number line.

$$45 + 8 =$$

Solve the equations using the diene and the number line.

$$84 + 7 =$$

Solve the equations using the diene and the number line.

$$28 + 4 =$$

Ms Natale has 66 apples and Dr Biddulph has 18 watermelons. Ms Janes then comes and has 10 pineapples. How much fruit is there altogether? Write an equation and represent your answer using a part-part-whole or dienes.

Wednesday 1.12.21

MPI: Using number bonds to 10 to subtract 2-digit and 1-digit num-

'Fill in the missing numbers.'

$$10 - 3 = \square$$

$$20 - \square = 17$$

$$\square - 3 = 27$$

Complete the part-part-wholes.

$$10 - 1 = 9$$

$$49 = 50 - 1$$

$$20 - 1 = 19$$

$$48 = 50 - 2$$

$$30 - 1 = 29$$

$$47 = 50 - 3$$

$$40 - 1 = \square$$

$$46 = 50 - \square$$

$$50 - 1 = \square$$

$$45 = 50 - \square$$

$$60 - \square = 59$$

$$44 = \square - 6$$

$$70 - \square = 69$$

$$43 = \square - 7$$

$$\square - 1 = 79$$

$$\square = 50 - 8$$

$$\square - 1 = 89$$

$$\square = 50 - 9$$

$$\square - 1 = 99$$

Complete the part-part-wholes.

Thursday 2.12.21

MPI: Using subtraction through ten strategy to solve subtraction equations.

Solve the equations using the diene and the number line.

$$53 - 8 =$$

Solve the equations using the diene and the number line.

$$91 - 5 =$$

Solve the equations using the diene and the number line.

$$36 - 8 =$$

There were 85 fish in a pond. On Monday a cat caught 7 fish. On Tuesday the cat caught another 5 fish. How many fish are left in the pond. Show your answer on a number line and using a part-part whole.
