

Draw representations of the facts below.

1) $5 \times 2 = 10$

2) $1 \times 6 =$

3) $3 \times 3 =$ (Challenge - What other facts can you derive from them?)

Match the facts.

$5 \times 7 = 35$

$18 \div 9 = 2$

$2 \times 9 = 18$

$4 \times 6 = 24$

$24 \div 6 = 4$

$35 \div 5 = 7$

Part B -

fill in the gaps (use the arrays to help if you are stuck)

$4 \times 3 = \underline{\quad}$

$\underline{\quad} \times \underline{\quad} = \underline{\quad}$

$\underline{\quad} \div \underline{\quad} = \underline{\quad}$

$\underline{\quad} \div \underline{\quad} = \underline{\quad}$

$2 \times \underline{\quad} = 12$

$\underline{\quad} \times \underline{\quad} = \underline{\quad}$

$\underline{\quad} \div \underline{\quad} = \underline{\quad}$

$\underline{\quad} \div \underline{\quad} = \underline{\quad}$

$4 \times 7 = \underline{\quad}$

$\underline{\quad} \times \underline{\quad} = \underline{\quad}$

$\underline{\quad} \div \underline{\quad} = \underline{\quad}$

$\underline{\quad} \div \underline{\quad} = \underline{\quad}$

Exploring the link between multiplication and division

Part C

1) What is the same? What is different?

$$4 \times 3 = 12$$

$$4 \times 6 = 24$$

2) If you know that $11 \times 5 = 55$ what else do you know?
